As part of Cybersecurity Awareness Month[2] in October, Duke’s IT Security Office is inviting Duke faculty, staff and students to #ThinkSecure: Duke users who test their phishing knowledge in the new Duke Security Education platform[3] will be entered in a raffle to win an Apple Watch. Log in with your Duke NetID and password to access the platform[3], then go to "Change Behavior / My Training" to view the modules.

If you watch one 10-minute “Introduction to Phishing” module in the Duke Security Education[3] platform, you will be entered in a raffle to win an Apple Watch. If you review any 4 additional modules (5 modules total), you'll be entered into a second drawing. One hundred winners will be selected to receive a #thinksecure T-shirt and other security-related swag.

Throughout October, Duke’s IT Security Office and the Office of Information Technology will share daily security tips and resources. Follow @DukeOIT on Twitter[4] for more.

Duke IT staff will present two Learn IT @ Lunch webinars and are available to present on demand for departments, units and groups. Email security@duke.edu[5] to request a presentation.

Check out these events in October:

- **Oct. 14:** Learn IT @ Lunch webinar, “Working Securely from Home... with Children- Family
