Security update for iPhone, iPad users [1]

January 27, 2021

Duke’s IT Security Office is urging Mac users to update their iPhone or iPad to iOS 14.4 or iPadOS 14.4 immediately, after researchers uncovered multiple vulnerabilities in the software powering iPhones and iPads. Read more about the security vulnerabilities [2].

The vulnerabilities disclosed yesterday may already been actively exploited, according to Apple. Learn more about the importance of keeping devices updated. [3]

Additional technical details on the updates are posted on Apple’s support site: https://support.apple.com/en-us/HT212146 [4].
